SKILLS

Languages:	Java, JavaScript, C++
Frontend:	HTML and CSS, Bootstrap, React
Backend:	Spring Boot, REST APIs
Tools:	Git, GitHub, Maven
Soft Skills:	Collaborative Mindset, Strategic Resolution, Analytical Thinking, Problem Solving

PROJECTS

Loan Management System React, JavaScript, CSS	May'26-Jun'26
- Designed and developed an interactive dashboard interface for loan management system using React to streamline client loan tracking, payment history records, and remaining balance calculations. - Implemented dynamic state updates and filters to track and update customer loan statuses(active, completed, due) with localized currency formatting for improved readability and user experience. - Built modular and reusable React components, including dashboard widgets, transaction tables, loan forms, and summary cards, ensuring scalable application architecture, easier maintenance and responsive performance.	
Student Performance & Well-being Intelligence System Java, JDBC	Feb'26-Mar'26
- Developed a desktop-based student analytics system using Java and JDBC to monitor academic performance, attendance percentages, evaluate assignments and provide comprehensive student progress insights through intuitive interface. - Implemented a rule based analytics engine to project final attendance, identify burnout risk levels, and analyze academic trends by evaluating GPA changes, and student workload patterns. - Integrated a relational database with JDBC to perform CRUD operations for student profiles, course information, attendance records, and performance reports while ensuring efficient data retrieval and maintainable architecture.	

ÄUM- The Third Eye Chakra HTML5, CSS3, JavaScript, Figma	Nov'25-Jan'26
- Designed an accessibility-focused UI/UX for a mental health wellness website, creating intuitive user journeys and calm visual layouts to support stress-sensitive and anxious users. - Developed responsive layouts using CSS grid, flexbox, smooth animations, and calming visual elements to improve overall user engagements over different screen sizes. - Improved usability and user trust by reducing cognitive load, simplifying navigation, and applying inclusive visual design principles for seamless access to therapy resources and self-help content.	

CERTIFICATES

Product Management CipherSchools	Aug'25
User Interface and User Experience Design CipherSchools	Aug'25
Build Generative AI Apps and Solutions with No-Code Tools Infosys	Aug'25
ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM Infosys	Jul'25

ACHIEVEMENTS

Secured 2nd Runner-Up (International) at <i>Technoxian 9.0 – Robo Hockey</i> , World Robotics Championship	Sept'25
Recognized in the LPU Achievers List for international-level performance in robotics competitions.	Nov'25

Extra-Curricular Activities

- Completed a Community Development Project on skill training, gender equality, and social awareness with the <i>Chikka Federation of India</i>. - State-Level Football Player, represented Arunachal Pradesh in multiple state-level football matches. - Attended a 3-Day Cybersecurity Symposium, gaining exposure to current security threats, practices, and industry perspectives. 1st Runner-Up, Centre for Professional Enhancement ,Communication Skills Competition.
